

Protect Deodorant

Is Shaklee Protect Deodorant an antiperspirant?

It is a deodorant, not an antiperspirant. We want to support the body's natural process of perspiration and at the same time keep you feeling dry and smelling clean.

What is the difference between a deodorant and an antiperspirant?

A deodorant works by neutralizing and absorbing odors associated with perspiration as well as absorbing moisture. Antiperspirants are designed to reduce sweat on the skin by blocking perspiration. Antiperspirants do this with aluminum chlorohydrate, which blocks your pores and sweat glands to temporarily stop the body's natural process.

Is Protect Deodorant better for me than an antiperspirant?

Protect Deodorant is a clean, nutrient-rich formula that offers four forms of protection against odor and wetness:

1. Supports a healthy skin microbiome with coconut fruit extract & *Lactobacillus*
2. Supports a healthy skin pH with an amino acid derivative
3. Neutralizes and absorbs odor with zinc salts
4. Absorbs wetness with 25% arrowroot powder and activated charcoal powder

If you prefer a product without aluminum or sodium bicarbonate, Protect Deodorant is for you. It is effective without interfering with your body's natural processes AND helps you feel good about what you are putting on your body.

Why did Shaklee decide to launch a deodorant and not an antiperspirant?

Our objective in launching a deodorant is to evolve with our consumers' interests and meet them where they are, incorporating the latest clean and effective ingredients in the best available product on the market. See further FAQs.

How does Protect Deodorant work?

Protect Deodorant offers four forms of protection against odor and wetness. It contains ingredients that support a healthy skin microbiome, support a healthy skin pH, neutralize odor, and absorb underarm wetness.

What makes Protect Deodorant different?

Protect Deodorant was developed using a clean ingredient profile that doesn't contain 2,500+ chemicals or questionable ingredients you'd rather not use on your body. Protect Deodorant is formulated with ingredients that:

- Allow your body to perspire freely
- Neutralize and absorb odor
- Support a healthy skin microbiome
- Help absorb wetness
- Soothe, nourish, and protect the delicate underarm area

Protect Deodorant is formulated without aluminum chlorohydrate, and without sodium bicarbonate for less underarm irritation.

Will my body need to adjust if I am used to using an antiperspirant?

Some potential adjustments you may notice when switching to a deodorant without aluminum:

- More natural perspiration (sweat) under your arms
- A brief period of increased odor as pores unblock and become used to this new mode of action

What is the best way to use the Shaklee Body line?

1. We recommend beginning with Revitalize Body Wash: Lather with water and rinse thoroughly.
2. Exfoliate with Reveal Exfoliant twice weekly.
3. Follow with Restore Body Serum: Apply all over clean, dry skin. Allow to dry.
4. Then layer with Nourish Body Lotion to seal in moisture.
5. Apply Protect Deodorant to your underarms daily on clean dry skin.
6. Apply Renew Lip Serum twice daily. We recommend using it in the morning to finish your daily skin care routine and again at night with a generous application to the lips and lip lines for an overnight lip mask treatment.

Is Shaklee Body Protect Deodorant consciously formulated and purpose-driven?

At Shaklee, we love packing our products full of skin-loving ingredients. We also believe it's important that you know what is in your body products.

- We continue to set the standards for clean beauty with formulas that exclude 2,500+ potentially harmful ingredients
- Protect Deodorant is vegan & cruelty-free
- Products do not contain parabens, sulfates, silicones, artificial colorants, or PEGs
- We believe the body products you use every day should make a difference in your skin and support your 360° overall health and wellness
- We believe in ethically sourced ingredients and are committed to formulating with clean and effective ingredients that don't compromise performance and luxury
- We believe in treating the body on the outside as you treat it on the inside. We use select soothing botanicals, antioxidants, nutrients, vitamins, and omega fatty acids and only use synthetic ingredients when they are warranted to enhance experience and efficacy.

Are all the Shaklee Body products gluten-free?

Yes, all Shaklee Body products are gluten-free.

Are all the Shaklee Body products non-GMO?

Yes, all Shaklee Body products are non-GMO.

Is this new line OK for use while pregnant?

Yes. It is safe to use this product while you are pregnant. We formulate with clean, effective ingredients. They are dermatologist-tested and -approved. We always recommend that you consult with your OB health care professional if you have any specific concerns regarding whether a product is appropriate for you.

Are these products intended for use by women as well as men?

Yes, all Shaklee Body products are designed for both women and men.

What kind of packaging does Shaklee Body use?

Our Body Care collection is sustainably packaged in the US from post-consumer recycled plastic and polypropylene.

Is Shaklee Body packaging recyclable?

Yes, the Shaklee Body collection is recyclable and sustainably packaged in the US from post-consumer recycled plastic and polypropylene. See below for recycling instructions.

- **Body Wash, Lip Serum, and Body Exfoliant:** Remove the cap from the bottle/jar and recycle both.
- **Deodorant:** Remove the inner protective disc cap and the outer cap from the base (twist-up component) and recycle all three.
- **Body Serum and Lotion:** Recycle cap only. The tube and bottle are made from post-consumer recycled plastic and can be thrown away.

What are the scent and fragrance notes in Protect Deodorant?

Scent: Beach

Fragrance Notes: Coconut, lavender, white woods, and black pepper for a calming, grounding experience

The Shaklee signature notes in our body line are integrated at the lowest level needed to cover the base. They are inspired by nature and intentionally formulated in compliance with IFRA regulatory standards and contain only RIFM (Research Institute for Fragrance Materials)-approved ingredients that are nontoxic, gentle to the skin, and free of phthalates, parabens, bisphenols, and animal derivatives.

The body line is dermatologist-approved and has been clinically tested for skin sensitivity.

How does Shaklee Body align with the Shaklee Mission?

When we reflect on our mission of bringing true wellness to the world, we believe this portfolio of products—and those still to come—are a testament to that commitment. Be it the pursuit of emotional or physical well-being, the Shaklee Body line was developed to be an experiential way to Supplement your Self Care™—a unique claim that only Shaklee can make for a product line that will help you look younger, longer.

SCIENTIFICALLY FORMULATED:

Protect Deodorant is formulated with potent antioxidants from upcycled muscadine grape seed oil. The muscadine grape powers the entire Shaklee Body collection, our anti-aging supplement Vivix®, and select products in the YOUTH® Skin Care line.

VITAMIN-INFUSED:

We are best known for our nutrition legacy and to complement our internal nutrition products, we've infused Shaklee Body with vitamins, nutrients, and powerful antioxidants to deliver a complete 360° approach to wellness.

EARTH-FRIENDLY:

We love the Earth and we don't want our packaging to add additional waste, so our collection is sustainably packaged in the US from post-consumer recycled plastic and polypropylene. Some pieces can be recycled again, and some have been recycled so many times that they're at the end of their lifecycle. There will be minimal to no outer packaging.
