Life+

TRIPLE-ACTION COLLAGEN SUPPORT FOR LIFELONG RESILIENCE*

Joints that move freely. Skin that looks firm & smooth. A body that feels like it's working with you. Liquid BioCell® Life+ is formulated to support your entire collagen lifecycle in three dimensions: protect what you have, stimulate renewal, & build what's weakening.* Powered by patent-pending TriPlex Technology™, featuring award-winning Collagen/HA Matrix® plus precision-targeted bioactives. This isn't just collagen; this is transformation. Redefine how you move, look & feel to live age free.*

Life+ (single) | #21432
RETAIL PRICE: $ 94.10 | MEMBER PRICE: $79.99
PV: 61.50

Life+ (2 Pack) | # 89883
RETAIL PRICE: $178.80 | MEMBER PRICE: $152
PV: 116.85

COLLAGEN SCIENCE – EVOLVED

Why We Love It

Supports collagen across its full lifecycle* — Helps protect existing collagen, optimize its environment, and promote renewal so collagen remains strong and youthful over time.*

Powered by TriPlex Technology™ — A patented system combining clinically studied Liquid BioCell® Collagen/HA Matrix® with targeted bioactives that work across multiple pathways to elevate collagen performance.*

Helps maintain the body's structural integrity* — Supports collagen across skin, joints, bones, and connective tissues, helping maintain strength, stability, and mobility throughout the body.*

More than just building collagen — While typical collagen products focus only on adding more, Life+ supports how collagen is built, protected, and maintained for more complete results.*

Designed for real life, every day — A convenient and delicious liquid you can take on its own or mix into your favorite beverage, making daily consistency effortless.

DIRECTIONS: Shake well before each serving. Take 1 tablespoon twice daily for optimal results. **Refrigerate after opening.**

Supplement Facts

Serving Size: 1 Tablespoon (15 mL)
Servings Per Container: 30

	Amount Per Serving	% Daily Value
Calories	10	
Total Carbohydrate	2 g	<1%*
Total Sugars	1 g	†
Includes 0 g Added Sugars		0%*
Biotin	15 mcg	50%
Zinc (as Zinc Gluconate)	2.5 mg	23%
Boron (Calcium Fructoborate)	2.7 mg	†
TriPlex Technology™	695.5 mg	†
Liquid BioCell (Hydrolyzed Chicken Sternal Cartilage Extract providing Hydrolyzed Collagen Type II Peptides, Chondroitin Sulfate, and Hyaluronic Acid), Calcium Fructoborate, Fucoidan (Wakame Extract) (sporophyll), Masson Pine Bark Extract (bark)		

* Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

Other Ingredients: Purified Water, Apple Juice Concentrate (fruit), Blueberry Juice Concentrate (fruit), Grape Juice Concentrate (fruit), Pomegranate Juice Concentrate (fruit), Glycerin, Citric Acid, Natural Flavors, Potassium Sorbate, Rebaudiana A (Stevia Leaf Extract), Xanthan Gum, Acai Extract (fruit), Purple Potato Juice (color), Mannitol.

Support You Can Feel. Strength You Can See.

Advanced Ingredients Help Support:

JOINT MOBILITY *

Supports fluid, comfortable movement.*

BONE DENSITY *

Reinforces strength & structural resilience over time.*

WRINKLE REDUCTION*

Visibly smooths deep wrinkles over time.*

HAIR, SKIN & NAILS*

Supports strength & healthy growth from within.*

CARTILAGE INTEGRITY *

Helps absorb impact & support joint stability.*

CONNECTIVE TISSUE HEALTH*

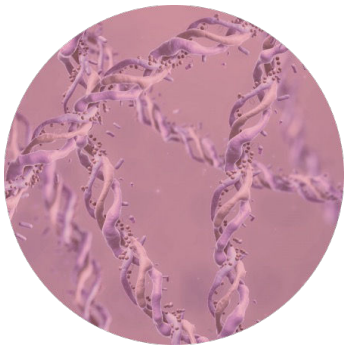

Strengthens the body's connective framework.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Shaklee®

Inside TriPlex Technology™

Patent-pending TriPlex Technology™ pairs our award-winning collagen matrix with expertly selected bioactives to protect, stimulate, and build your entire collagen lifecycle.*

Liquid BioCell®

Calcium Fructoborate

LIFE+

Protect. Stimulate. Build. Complete Collagen Lifecycle Support.*

FAQS

1. **What is Liquid BioCell® Life+?**
   Liquid BioCell Life+ reflects an evolution in collagen science, built on TriPlex Technology™, which combines the clinically studied Liquid BioCell® Collagen/HA Matrix® with additional targeted bioactive ingredients. Together, these ingredients work across multiple biological pathways involved in collagen health, helping protect existing collagen, support the environment that stabilizes and strengthens collagen fibers, and stimulate the body's natural collagen renewal processes.* By supporting these aspects of collagen biology, Life+ helps maintain the strength, resilience, and structural integrity of connective tissues over time.*

2. **What is TriPlex Technology™?**
   TriPlex Technology™ is the system behind Liquid BioCell® Life+. It combines the clinically studied Liquid BioCell® Collagen/HA Matrix®, which provides bioactive collagen peptides, hyaluronic acid, and chondroitin sulfate, with targeted bioactive ingredients, including calcium fructoborate, pine bark extract, fucoidan, and essential minerals.
   Together, these ingredients are designed to support collagen across its full lifecycle, helping protect existing collagen, support the environment that keeps it strong, and stimulate the body's natural collagen renewal processes by working across multiple biological pathways involved in collagen health.*

3. **What is the Collagen/HA Matrix?**
   The Collagen/HA Matrix is a key component of TriPlex Technology and the patented foundation of Liquid BioCell. It is a clinically studied, single-source complex that provides bioactive collagen peptides, hyaluronic acid, and chondroitin sulfate.
   These ingredients naturally occur together in connective tissues, where they help support hydration, cushioning, and structural integrity.* Bioactive collagen peptides help signal collagen-producing cells, while hyaluronic acid and chondroitin sulfate help maintain the hydrated, cushioning environment that surrounds collagen fibers.* Together, they help support joint comfort, skin resilience, and the structural framework of connective tissues throughout the body.*

4. **How is Life+ different from other collagen supplements on the market?**
   Most collagen supplements focus only on adding more collagen. Life+ takes a more comprehensive approach by supporting collagen across its full lifecycle.* Instead of focusing only on replenishing collagen, Life+ is designed to help protect existing collagen, stimulate natural collagen renewal, and build the supportive environment collagen needs to remain strong and resilient.*
   - **Protect** - Polyphenol antioxidants help neutralize free radicals, support the body's antioxidant defense systems, and help support balanced inflammatory signaling that can activate collagen-degrading enzymes, helping defend existing collagen from everyday breakdown caused by oxidative stress and inflammation from everyday activity.*
   - **Stimulate** - Bioactive collagen peptides act as signaling molecules that help stimulate collagen-producing cells. Additional nutrients support the enzymes and cellular energy processes required for collagen synthesis, helping maintain the body's natural collagen renewal as production gradually slows with age.*
   - **Build** - Hyaluronic acid and chondroitin sulfate help maintain the hydrated, cushioning extracellular environment that surrounds collagen fibers, while essential minerals help support the structural framework of connective tissue and bone, creating the environment collagen needs to remain strong, resilient, and structurally supportive.*

5. **Why is supporting the full collagen lifecycle important?**
   Collagen is constantly being broken down and rebuilt as part of the body's natural renewal process. With age and everyday stressors like oxidative stress and inflammation from everyday activity, this balance shifts. Collagen breaks down faster, and the body also produces less of it. At the same time, the hydrated environment that supports collagen can weaken.
   Supporting the full collagen lifecycle—by helping protect existing collagen, maintain the environment that stabilizes it, and stimulate natural renewal—helps preserve stronger, more resilient collagen and connective tissues over time.

FAQS

6. **What benefits can I expect?**
   Life+ is designed to support:
   - Joint mobility and comfort*
   - Healthy bone density and strength*
   - Cartilage and connective tissue integrity*
   - Skin hydration and resilience*
   - Structural support from within*

7. **Is Life+ just for beauty?**
   No. While Life+ supports healthy hair, skin, and nails, it is designed to support collagen throughout the entire body.* Collagen is a key structural protein that forms the framework of the skin, as well as joints, bones, cartilage, and other connective tissues, helping give these structures strength, cushioning, and resilience. Because collagen helps maintain the integrity and stability of these tissues, supporting collagen can help maintain not only skin health but also:
   - Joint mobility and comfort*
   - Bone density and strength*
   - Cartilage and connective tissue integrity*
   - Skin firmness and hydration*

8. **Who is Life+ for?**
   Beginning in our 20s, collagen biology begins to change. The body gradually produces less collagen, while the rate of collagen breakdown increases. At the same time, the surrounding environment that supports collagen can lose hydration and structural stability, and newly formed collagen fibers may not be as strong or resilient as those produced earlier in life.
   Because collagen forms the structural framework of skin, joints, bones, and connective tissues, these changes can gradually affect tissue strength, flexibility, and resilience. Supporting collagen biology early can help maintain the integrity of these structures over time.
   Life+ is designed for adults, particularly those in their 20s and beyond, who want to:
   - Support joint mobility and comfort*
   - Maintain connective tissue strength and resilience*
   - Support skin firmness and hydration*
   - Take a proactive approach to structural aging*

9. **What is the difference between Liquid BioCell Life and Life+?**
   Liquid BioCell delivers the multi-patented Liquid BioCell Collagen/HA Matrix® Technology, which provides bioactive collagen peptides, hyaluronic acid, and chondroitin sulfate that help support skin hydration, joint mobility, and connective tissue health.*
   Liquid BioCell Life+ contains that same Collagen/HA Matrix but goes further by incorporating it into patent-pending TriPlex Technology. The TriPlex Technology combines the Matrix with additional targeted bioactives designed to help protect existing collagen, support the environment that stabilizes collagen fibers, and stimulate the body's natural collagen renewal processes, helping maintain more youthful, resilient collagen and stronger connective tissues over time.*

10. **What is the difference between Collagen-9® and Life+?**
    Collagen-9® provides 10 g of collagen, including all nine essential amino acids. These amino acids supply the building blocks the body uses to produce new collagen.*
    Life+ helps the body use those building blocks: It provides bioactive collagen peptides that signal collagen-producing cells to build collagen using available amino acids, while additional ingredients help protect existing collagen and support the extracellular environment that surrounds and stabilizes collagen fibers.*

FAQS

11. **Can I use Collagen-9® and Life+ together?**
    Yes. Collagen-9 and Life+ can complement each other. Collagen-9 provides collagen, which supplies amino acid building blocks necessary to produce new collagen, while Life+ helps the body use those building blocks.* These building blocks can also come from other dietary protein sources such as Life Shake®, Shaklee Sparkling Protein™, or other protein-rich foods. However, Collagen-9 provides collagen and all 9 essential amino acids, along with vitamin C and biotin, which support healthy hair, skin, and nails.*

12. **How do I take Life+?**
    Take 1 tablespoon twice daily for optimal results, preferably in the morning and evening. Enjoy on its own or mixed with your favorite beverage. Shake well before each use and refrigerate after opening.

13. **Can I use Life+ if I'm pregnant or nursing?**
    Life+ is not recommended for use during pregnancy or while nursing. If you are pregnant or breastfeeding and considering collagen supplementation, please consult your OB or health care professional before use.

14. **Can I use Life+ if I'm on any medications?**
    If you have a medical condition, are taking prescription medications, or have any concerns about how Life+ may affect you, please consult your physician before use to ensure it's safe for your individual needs.

15. **Is Life+ vegan?**
    No, Life+ is not vegan.

16. **Is Life+ gluten-free?**
    Yes, Life+ is gluten-free.

17. **Is Life+ kosher certified?**
    No, Life+ is not kosher certified.

18. **Is Life+ nondairy?**
    Yes, Life+ is nondairy.
